

23km Waterfall Explorer

This ride is designed especially for families and newcomers to cycling and takes participants along the flat Paradise Valley to a spectacular waterfall deep in the rainforest. The course passes through some picturesque farming land before weaving through the rainforest to its turnaround point in the wilderness.

The course is an out-and-back ride that's 11.5km one way from the start at Apollo Bay to the turnaround location. From here it is a short, self guided walk to the waterfall to experience the supreme tranquility of the rainforest while we provide security over your bikes.

The ride is essentially flat and goes along a very quiet road so is achievable by kids and cycling novices.
